

# D'Ewart Representatives, L.L.C.

*a non-stocking manufacturer's representative*

PO Box 866, Bothell, WA 98041 425-485-6545 [www.dewart.com](http://www.dewart.com)

**Allwire, Inc.** – Control cable and Specialty wire products

**AMSC (American Superconductor Corp.)** – STATCOM system, SVC solutions, Superconductor CableSystems, Fault current limiters, Power quality solutions

**Buckingham** – Tools for Linemen, Fall Prevention, Climbing tools

**Copperweld Bimetallics, LLC.** – Copper cladding metallurgically bonded to a steel core, combines the strength of steel with the conductivity and corrosion resistance of copper.

**EDM International, Inc.** – PhaseTrakker® Inspection and Assessment services

**Hastings Hotline Tools** – Hotline tools and Equipment

**Hughes Brothers** – Wood, Steel and Fiberglass T&D materials

**Incab America LLC** – OPGW, ADSS and all types of Optical Cable

**Laminated Wood Systems** – Laminated wood poles, PhaseRaiser for raising structures, PoleEnforcer reinforcement

**Marmon Utility:**

**Hendrix Molded** – PE Insulators 35kv and below, Pin and Vice Type and Wild Life Protection

**Hendrix (XLP) and Kerite (EPR)** – Primary URD Power Cable

**Kerite High Voltage & Specialty Cable** – High Voltage Power Cable & Services, 46kV – 138kV

**Meiden America Switchgear** – 72.5kV to 145kV Substation Air Insulated Vacuum Circuit Breakers

**Nehring Wire Works** – Copper and Aluminum Bare and Insulated Wire, Ground Rods

**NOJA Power** – Provides high quality assured 15kV-38kV single and three-phase Automatic Circuit Recloser

**Nordic Fiberglass** – Box pads, Sectionalizing Cabinets, and Pedestals for URD

**PPC Insulators** – Porcelain Insulators for Substation and T&D

**Power Partners** – Distribution transformers, Pole mounted single phase 5-1000KVA and three phase 30-500KVA at 34.5kV and below. Single-Phase Pad-Mounted Distribution Transformers up to 100 KVA

**Ripley Co.** – Cable preparation tools

**Rugged Monitoring** – Fiber Optic Temperature Sensing for Power Transformers

**Scott Engineering** – Padmounted and Polemounted equipment: Switchgear, Sectionalizing, Capacitors

**SEECO** – High Voltage Air and Load Break Switches, GOABS®, Motor Operators, Sensors

**Sediver USA** – Experts & pioneers since 1947 in toughened glass insulator technology for T&D

**Sentient Energy** – Combines intelligent sensors easily deployable on any powerline with powerful management and analytics applications enabling utilities to detect faults, preempt problems and deliver dependable power

**Shakespeare** – Fiberglass Poles and Fiberglass Cross-Arms **Carsonite Composites** – Visibility and safety marking products

**TAPP** – T&D steel structures incl: monopoles, H-Frames, 3 pole structures, and highly customized configurations

**Technibus** – Metal enclosed bus systems including Isolated Phase Bus, Segregated Bus and Non-Segregated Phase Bus Systems and Field Service

**TransGard** – Animal-deterrent fencing for electrical substations

**Trayer Engineering Corporation** – 5-35 kV Padmount and Submersible MV Vacuum Switchgear Products
