

NEW EZ SQUEEZE™ IMPROVEMENTS

NOW ON ALL MODELS OF THE EZ SQUEEZE™

Old Handle Vs. New Handle

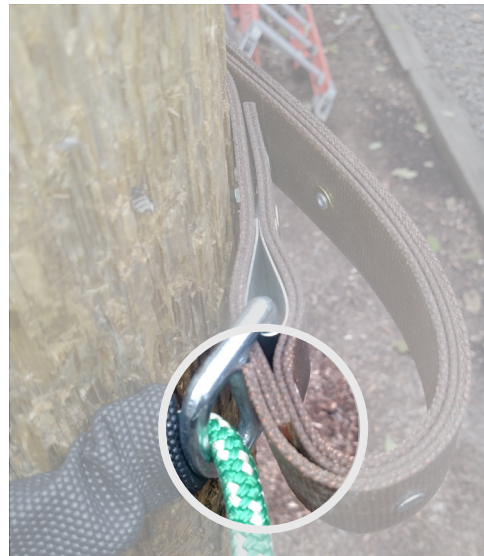

The new handle has been reinforced to provide more rigidity, which makes ascending and descending easier.

Reinforced handle
for more rigidity.

Old Handle in Use Vs. New Handle in Use

The new design & placement provides user with easier lateral movement by preventing rope from coming in contact with the handle.

This improvement also moves the handle forward putting your hands more in-line, which closely simulates the old feeling of "hitchhiking."

**All EZ Squeeze's™ marked with a manufacture date of 1/18 or thereafter will have this new design.*
